### Print Down Cabinets

These print-down cabinets expose indirect and direct stencils onto all types of film with sharpness and precision. Exposure is provided by mercury vapour lamps via a 6mm toughened glass screen. A handy light box facility aids setting up, viewing and spotting out. Exposure times are, of course, digitally controlled.

### A2 / A1 Screen Printing Systems

A1 System

These superb screen printing systems are supplied complete with a stand and whisper-quiet vacuum system. Both models will accommodate material up to 50mm thick and have frame-lift angle stops which are adjustable to zero. Vacuum operation is automatic as the screen is lowered for printing. The melamine printing bed and work surfaces are ink and solvent resistant. These machines are robustly constructed for continuous use.

### Screen Washout Booth

This screen washout booth is ideal for stencil development, or to wash out screens for re-use. The booth is suitable for water-based screen printing products and is constructed from polypropylene on a powder-coated steel base frame. The unit is fitted with a mains water valve on the frame to which the optional handspray can be attached. If local regulations require it, the optional waste treatment unit will filter and trap waste emulsions and solid material.

### Drying Racks

AR-DRYRACK11

AR-DRYRACK16

These robust racks feature steel construction for strength, with plastic-coated racks for durability and easy maintenance. The smaller unit will easily accommodate A3 work, the larger unit will be needed for A2 sizes.

Both racks provide a compact solution for drying student's art work.
