

Computerised Sewing & Embroidery

brother Sewing and Embroidery Machines

Computerised Sewing & Embroidery Systems

These combination sewing and embroidery machines offer the latest in electronic control systems, a high specification and significant space saving advantage. You also, of course, get two machines for a lot less than it would cost to buy them separately. As sewing machines, they are set up and used in much the same way as their sewing-only counterparts so students will have no trouble moving between machines if one or more of these are used as part of a classroom set. All the machines have an on-board library of embroidery motifs, borders and fonts and it is possible to combine and edit these using the machine's display and control panel.

There are three machines in the range each featuring automatic needle threading and a colour LCD display for ease of use. Auto tension and thread sensors all contribute to the quality output you can expect from any of these machines.
